EXPERIENCE

Toro Cloud Philippines Pty Ltd

Jul 2024 – Present

Associate System Administrator

- Developed and maintained reusable Infrastructure as Code (IaC) modules using Terraform and Terragrunt, standardizing deployment workflows across a multi-account AWS environment while promoting scalable, DRY infrastructure practices
- Automated CI/CD deployment workflows using GitHub Actions and Bitbucket Pipelines, standardizing application deployments across multiple internal projects and reducing manual deployment effort
- Designed and operated self-hosted infrastructure on Proxmox using Docker, deploying centralized logging, monitoring, reverse proxy, and secure remote access services to improve infrastructure visibility, service reliability, and operational efficiency
- Conducted a comprehensive internal infrastructure security assessment spanning the application, transport, network, and internet layers, identifying critical vulnerabilities across TLS/PKI, firewall configurations, networking, and web applications, and driving prioritized remediation efforts to strengthen the organization's security posture
- Administered enterprise IT infrastructure across a cloud-first environment, managing Google Workspace, LDAP identity services, user onboarding/offboarding, role-based access, MFA enforcement, asset lifecycle management, pfSense firewall administration, security auditing, and end-user technical support to ensure secure and reliable business operations
- Implemented WPA2-Enterprise wireless authentication using RADIUS integrated with LDAP, replacing shared Wi-Fi credentials with centralized per-user authentication to strengthen network security and simplify access management
- Supported SOC 2 compliance initiatives by reviewing cloud security configurations, validating access controls, and maintaining audit documentation that improved organizational audit readiness

TECHNICAL SKILLS

- **Operating Systems & Networking:** Linux (Ubuntu), Windows Server, MacOS | Ubiquiti UniFi, pfSense, Traefik
- **Cloud Platforms & IaC:** AWS, Azure, GCP | Terraform, Terragrunt, AWS CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, Graylog, AWS CloudWatch
- **Containerization & Virtualization:** Docker, Podman, Colima | VirtualBox, Proxmox
- **CI/CD & DevOps :** GitHub Actions, Bitbucket Pipelines, GitLab CI/CD
- **Scripting & Databases:** Bash | Amazon DynamoDB
- **Identity & Collaboration:** LDAP, Google Workspace | Jira, Slack, MkDocs, GitBook

EDUCATION

Holy Angel University

Bachelor of Science in Information Technology: Network Administration

2024
