

NATHAN ELIJAH TORRES

Angeles City, Pampanga • contact@nathantorres.net • nathantorres.net

PROFESSIONAL SUMMARY

System Administrator with two years of experience managing cloud infrastructure and enterprise IT operations in a lean, fast-paced environment. I've taken ownership of AWS and on-premises infrastructure, CI/CD automation, and reusable Infrastructure as Code using Terraform and Terragrunt. I also manage internal IT operations, including Google Workspace, identity and access management, employee lifecycle processes, networking, and technical support. This broad scope has given me hands-on experience across infrastructure, automation, security, and the day-to-day operations that keep an organization running smoothly.

EXPERIENCE

[Toro Cloud Philippines Pty Ltd](#)

Jul 2024 – Present

Associate System Administrator

- Developed reusable Terraform and [Terragrunt](#) modules to standardize AWS infrastructure deployments across multiple accounts, improving consistency and reducing configuration duplication
 - Automated CI/CD deployment workflows using GitHub Actions and Bitbucket Pipelines, standardizing application deployments across multiple internal projects
 - Troubleshoot and resolved failed CI/CD pipeline runs, fielding developer support requests and restoring deployments to minimize delivery downtime
 - Designed and operated self-hosted infrastructure on [Proxmox](#) using Docker, deploying centralized logging, monitoring, reverse proxy, and secure remote access services
 - Conducted a comprehensive internal security assessment spanning application, transport, network, and internet layers, driving prioritized remediation efforts
 - Administered enterprise IT infrastructure and day to day LAN operations, managing Google Workspace, LDAP identity services, onboarding/offboarding, MFA enforcement, and asset lifecycle management
 - Implemented WPA2-Enterprise wireless authentication using RADIUS integrated with LDAP, replacing shared Wi-Fi credentials with centralized per-user authentication
 - Supported SOC 2 compliance initiatives by reviewing cloud security configurations, validating access controls, and maintaining audit documentation
-

TECHNICAL SKILLS

- **Operating Systems & Networking:** Linux (Ubuntu), Windows Server, MacOS | Ubiquiti UniFi, [pfSense](#), [Traefik](#)
 - **Cloud Platforms & IaC:** AWS, Azure, GCP | Terraform, [Terragrunt](#), AWS CloudFormation
 - **Monitoring & Logging:** Prometheus, Grafana, Graylog, AWS CloudWatch
 - **Containerization & Virtualization:** Docker, Podman, Colima | VirtualBox, [Proxmox](#)
 - **CI/CD & DevOps:** GitHub Actions, Bitbucket Pipelines, [GitLab](#) CI/CD
 - **Scripting & Databases:** Bash | Amazon DynamoDB
 - **Identity & Collaboration:** LDAP, Google Workspace | Jira, Slack, [MkDocs](#), [GitBook](#)
-

EDUCATION

Holy Angel University

2024

Bachelor of Science in Information Technology: Network Administration
